Objective: Seeking a full-time position where 3 years as a fuel system operator will add value to company operations.

Highlights of Qualifications

- 3 years as QC/QA Section Leader for storage of bulk jet and diesel fuels.
- Skilled and organized in making timely decisions in demanding working conditions.
- Certified to perform an array of field and laboratory tests on various petroleum and lubrication products.

Experience

Supervision

- Team Leader for up to 8 people working in demanding and stressful situations.
- Instructed, supervised and evaluated the performance of groups up to 25 personnel.
- Monitored safe usage of over \$10M of fuel system gear resulting in 100% accountability for both personnel, and gear.

Problem Solving

- Performed daily safety checks to ensure proper operation of fueling systems, resulting in over 95% readiness 24 hours per day.
- Directed operations to ensure quick repairs during operations resulting in a Certificate of Commendation from Commanding Officer.

Communication

- Proven ability to communicate effectively in diverse environments.
- Experienced in telephone and radio communications.

Managed

- Maintained publications of over 1000 pieces of mission ready gear.
- Stored accurate inventory for fuel systems utilizing Microsoft programs as well as Fuel Accounting System spreadsheet logs.
